

There is too much violence and sexual subject matter on TV and radio. Broadcast and Cable media distributors should be held to a child freindly standard. Any program deamed violent by a single citizen should be withheld from that citizen's family without risk of losing other programs. Please arrange a system with which I can select just the PROGRAMS I want from cable companies. I can look at one episode and discern it's negative violent spirit. At that viewing I should be able to block that specifuc program from my property in perpituity. I am a professional architect with small children and do not have the time to "baby sit" the remote control. That should be Time Warner's job! They pump 80% garbage into my house, for which I am forced to pay, to get the good 20%. Surely the technology exists to put the liability on the distributor.

I grew up working in convience stores and porn magazines were not allowed to be viewed by the underage. It is illegal to have sex on our front lawn in plain view of neighbors. It is illegal to run butt naked along public roads. Televison and the internet are quickly merging sothe alleged INFORMATION HIGHWAY continues to develop. SO should it be illegal for providers to pump filth (violence and sex) into my house without a high standard of financial liability. The federal goverment must stop supporting the images so demeaning to the purity and innoscence of our youth.

Please make our airwaves cleaner by allowing us to pick only the programs we want thereby letting simple economics curtail the Hollywood elite. Please make our airwaves cleaner by subjecting media distributors to high financial liability standards for non-compliance.
